

HPC FREIGHT CONSOLIDATION CENTRE

WHO?

- ▶ Jays Logistics is a transport, warehousing and logistics company based 5 miles from J23 FMF
- ▶ Large and varied fleet able to transport flatbed loads to individual pallet, from modular buildings to an order of uniform.
- ▶ We can collect from any location, UK or Europe (usually the best value) or you can deliver to us.
- ▶ Warehousing and storage to hold large shipments and deliver in smaller loads as called off.
- ▶ Container Offloading
- ▶ Pick and Pack operation
- ▶ Online Portal for PODs, tracking & warehousing

WHAT?

The Freight Consolidation Centre (FCC) has been driven by the need to facilitate all manner of deliveries to HPC. There are several unique challenges with this project

- ▶ Development Consent Order heavily restricts the amount of delivery slots per day
- ▶ Security at a nuclear building site
- ▶ Euro IV and CLOCS vehicles
- ▶ Time – From checking into the FMF, driving to site along the approved route only, waiting for an escort, delivering, exiting back to the M5 via the approved route only can take 2 hours

Jays will consolidate smaller deliveries onto multidrop vehicles, with approved vehicles, drivers with full clearance or deliver full loads directly

TYPICAL CONSOLIDATED LOAD

These goods were going to the T1's directly or to their subbys working on the platforms
Remember we can deliver full loads as well.

WHY?

- ▶ On time, first time – we know the site and its challenges
- ▶ Reassurance – Jays is the authorised FCC, recommended by EDF and used by the majority of the Tier 1 contractors
- ▶ Ease – we do all the delivery administration
- ▶ Cost – Consolidation will reduce the costs and there are no hidden charges (waiting time, re-deliveries etc)
